MyMiniFactory platform Guide

April, 2022, by e-Nable Greece

Explore the platform

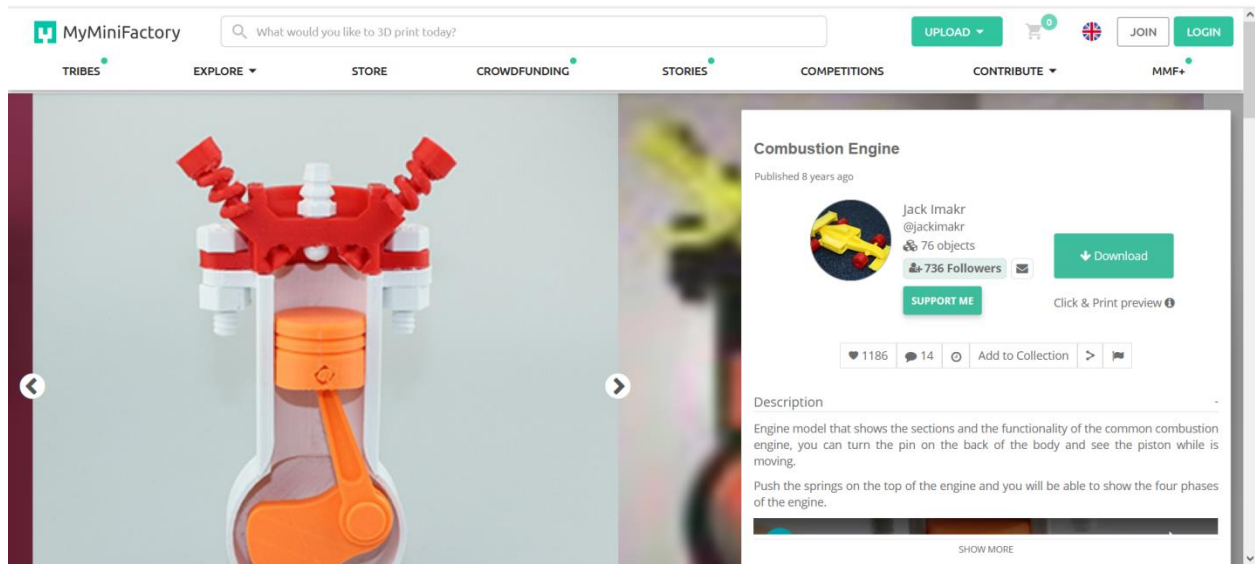

MyMiniFactory is a platform that provides designs for education- here you can find 3D printing ideas to cover your educative topics especially in STEM.

Visit <https://www.myminifactory.com/category/education> or visit <https://www.myminifactory.com> and click on “Explore” tab and select “Education” sector.

Explore your topic either by subject or by grade at the left column on your screen. Once you select a category you can navigate in all the 3d models of this category.

Search for models

Once you select the model fits your needs, then you can download the .stl files and any additional files (instructions for assembly, lesson plan, evaluation sheet, practice test etc.)

In addition below the description of the model there is a “Show more” field with information about: Printing details, technical information, object parts, tags, other files and more information.

3D print your model!

Congratulations you are now ready to slice and 3D print your model!
